

## Introduction to ArcGIS Online (AGOL)

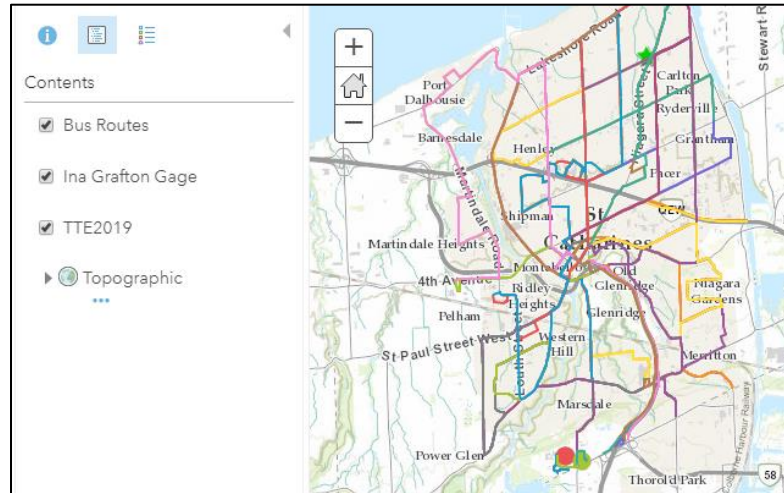

ArcGIS Online is a web mapping platform in the cloud. We will use this technology to create an interactive display of the data collected in the HLSC 3P96 course.

1. Go to <https://www.arcgis.com/home/signin.html> and sign in with your organizational login.
2. From the links across the top, click “Map”.

### Adding data to the map

3. Click **Add > Search for layers** (This option searches our organization for available layers)
4. Change the folder to search in from **My Content** to **My Organization**.
5. In the search window type **TTE2019** and hit enter. The layers that were created for Collector for ArcGIS are listed here.
6. Click the plus symbol  to add each layer to the map.
  - a. TTE2019
  - b. Ina Grafton Gage
  - c. Bus Routes
7. Click the back arrow to the left of My Organization.
8. Click the Content button to see the list of layers added to your map.

9. The layers are listed by drawing order. Move the Bus routes layer below TTE2019 by dragging it using the 3

vertical dots to the left of the layer name

10. To Save the map, click **Save > Save As**. Provide a unique **title**, **tags** and **summary**. The **Save in folder** option should default to your content.
11. Click **Save Map**.

Summary:

Group 2 - HLSC3P96

Save in folder:

sjanzen

SAVE MAP

CANCEL

## BASICS

1. To turn the layer off, click the check box beside a layer name. For example, uncheck the Bus Routes layer.

2. Use the zoom tools or scroll wheel on the mouse to change the scale of the map view.

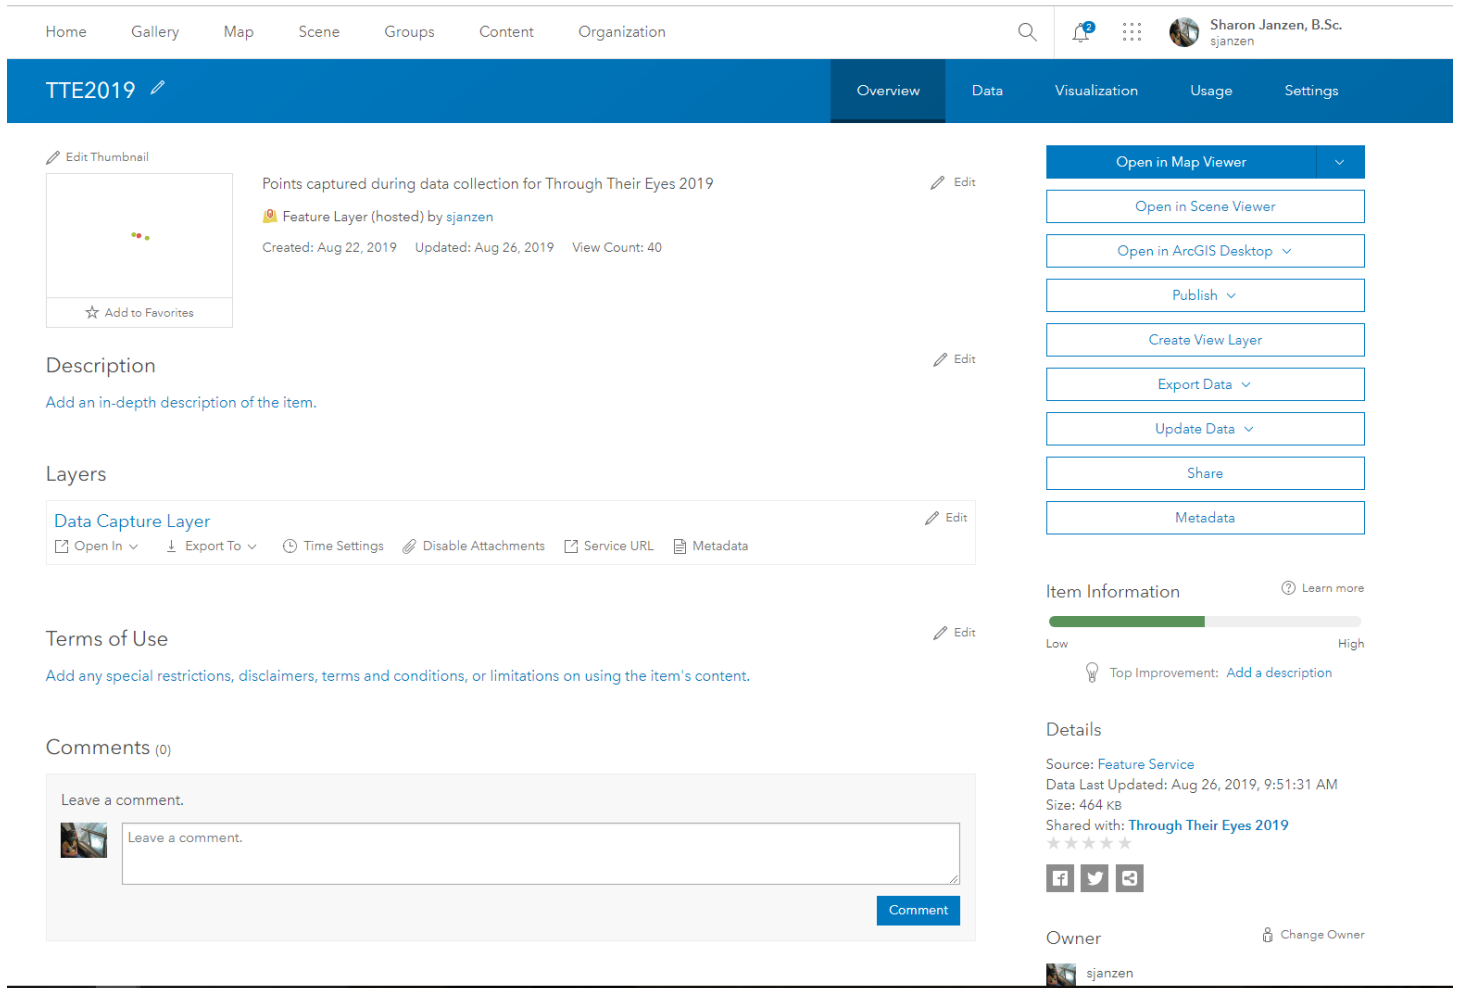

3. Alternately, click the ellipses next to a layer and select **Zoom To**. Notice the other options available through the context menu.

The **Zoom To** option zooms to the extent of the features in a given layer. You will notice the map is now enlarged to show just the location of Ina Grafton Gage. Zoom out a bit to reveal more of the surrounding area.

## Viewing Item Details – TTE2019

Click the ellipses for the TTE2019 layer and select  [Show Item Details](#). The Item Details page appears. There are a number of pieces of information describing the TTE2019 feature layer. For now, we want to Export this layer to a new layer so we can customize it based on our individual group needs.

The screenshot shows the ArcGIS Online interface for the item 'TTE2019'. The top navigation bar includes Home, Gallery, Map, Scene, Groups, Content, and Organization. The user profile 'Sharon Janzen, B.Sc. sjanzen' is visible in the top right. The item 'TTE2019' is selected, and the 'Overview' tab is active. The main content area displays the item's thumbnail, title 'Points captured during data collection for Through Their Eyes 2019', and metadata including creation and update dates, view count, and a description placeholder. A 'Layers' section shows the 'Data Capture Layer' with options to open, export, or edit it. On the right, a vertical toolbar offers actions like 'Open in Map Viewer', 'Open in Scene Viewer', 'Open in ArcGIS Desktop', 'Publish', 'Create View Layer', 'Export Data', 'Update Data', 'Share', and 'Metadata'. Below this, 'Item Information' shows a progress bar and a 'Top Improvement' suggestion. The 'Details' section provides source information, last update date, size, and sharing status. At the bottom, there is a 'Comments' section with a text input and a 'Comment' button.

1. Click **Create View Layer** from the options on the right.
2. From the dialogue box, give the new layer a name (i.e. TTE2019\_Group1).
3. Under **Save in Folder**, select your username at the top of the list.
4. Click OK.

Create View Layer

×

Create a new view of this feature layer that references the same data, yet allows you to independently set how it's shared with others, how it's drawn, what features are displayed (filtering) and whether it can be edited.

Summary: (Optional)

Save in folder:

- The **Item Details** page appears for the new layer.
- Click  to add the new layer to a map.

### Filtering

- Expand the legend of the **TTE2019\_Group#** layer to reveal all of the groups.
- To show points for your group only, click the filter button 
- Create an expression that matches the image below customized to your group number.

Filter: TTE2019

Create

+ Add another expression ☐ Add a set

Display features in the layer that match the following expression

☒ Value
 ☐ Field
 ☐ Unique

☐ Ask for values

- Click **APPLY FILTER AND ZOOM TO**.

## Changing the Symbology

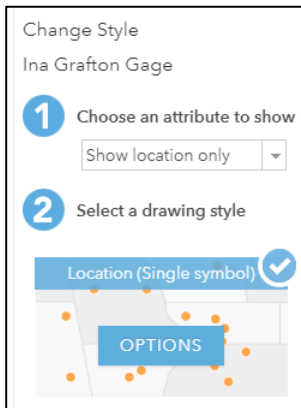

1. Click the title of a layer to expand the legend in the **Contents** pane. For example, click the layer name “Ina

Grafton Gage” to reveal the green star symbol

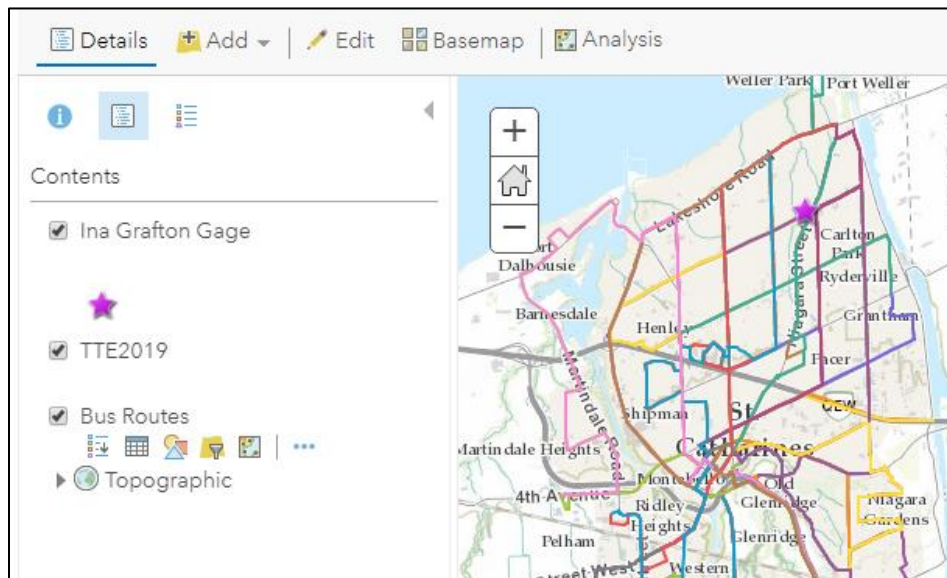

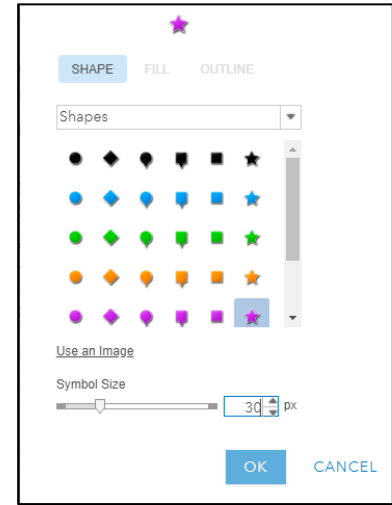

2. To change the symbol, click the symbology icon  found by hovering the mouse over a layer name.

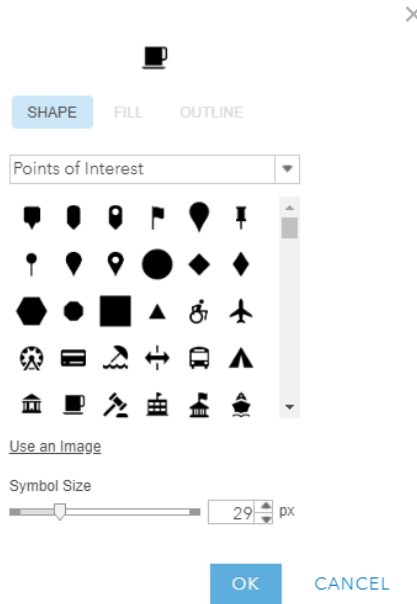

3. The Change Style panel appears:

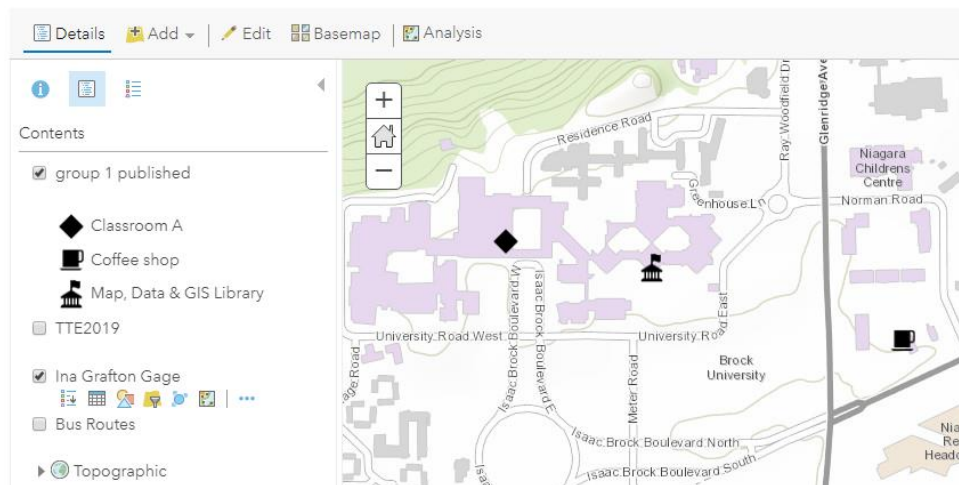

4. For step 1, keep the default **Show Location Only**.
5. For step 2, click **Options** for **Location (Single symbol)**.
6. Click the word, **Symbols**, beside the green star  **Symbols**
7. Choose an appropriate symbol, make sure the size is 30 px and click **OK**.
8. Click **OK** (bottom left of the panel). Then click **Done**.

4. For unique symbols: click the Change Style button , click **OPTIONS** for unique symbols then click each symbol and browse to the desired symbol.

5. Change the symbol size to approx. 30 (depends on the zoom level of the map)
6. Click OK twice and Done.

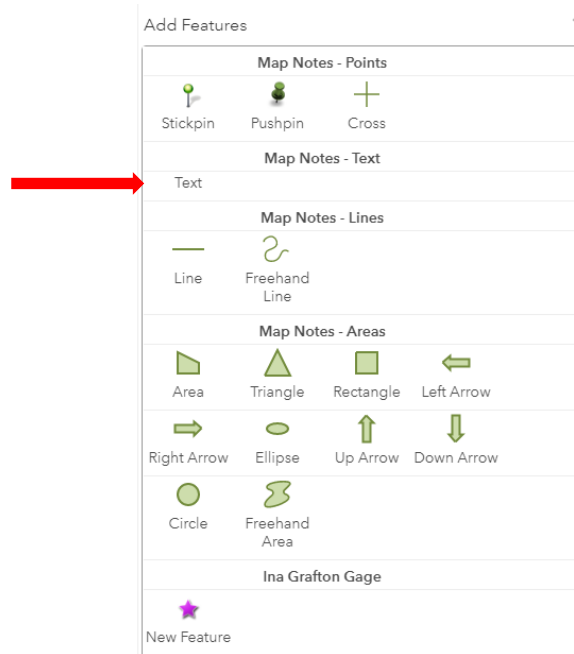

7. Click the ellipses and select **Save Layer** to save the symbology with your layer file.
8. To remove the original TTE2019 layer, click the ellipses and select Remove. Click yes to confirm.
9. Save the map.

### Adding Custom Features

Map Notes are additional custom details including text, points, lines, polygons, etc. This section will cover some basic customization of the map using Map Notes.

- From the  dropdown, click **Add Map Notes**. You are prompted to enter a name and select a template. Accept the defaults and click Create. The map is set to Edit mode and the Add Features template is available on the left.

- Click the Text feature and click on the map to add some text. Start typing and hit enter to finish.
- To move the location of text, click on the text to activate the edit functions.
- Drag the text to a new location.
- Experiment with adding other features included with Map Notes.
- When you are finished adding map notes, click the Edit button. To make additional changes, click the Edit button again.
- Click .

## Printing

- Click **Print > PDF Landscape**. This will generate a PDF version of the map based on the current zoom and display settings.
